

# ELECTRIC VEHICLE REBATES

- **Electric Vehicle (EV) Rebates**

1. Great Lakes Energy (GLE) members who purchase a new Electric Vehicle (EV) **and** install a Level 2 Smart Charger are eligible for a \$1,000 rebate.
2. GLE members who install a Level 2 Smart charger, **but do not** purchase a new EV are eligible for a \$500 rebate.

- **Qualifications**

Rebates are available to GLE members only. One rebate is allowed per account (meter) for one of the two offers above. The EV rebate is for brand new EV only and the Level 2 Smart Charger must be installed at the location where you receive electric service from GLE. Rebates will not be given until after installation of the charging station at the account location.

## **Follow these steps in order to receive your rebate:**

1. Verify the purchase of the new EV by providing a copy of the registration and sales receipt.
2. Install the Level 2 Charger at the location served with electricity by GLE.
3. Obtain verification of the EV Charging installation by a licensed contractor. You cannot perform the verification yourself, even if you do the installation. Contact a licensed contractor/electrician and fill out the form on the back. The contractor must fill out their portion completely. You are responsible for payment to the contractor for this service call.
4. Return the completed form and invoice/sales receipt to GLE.
5. GLE will review your submission and, if approved, will issue you a rebate check or credit your electric account within 30 days. **Rebate request must be submitted within 90 days of installation. Effective 1/1/20.**

**Call 1-888-485-2537, ext. 8957 with questions**  
**Email: [glenergy@glenergy.com](mailto:glenergy@glenergy.com)**

Program subject to change or cancellation at any time.
