A SUPPLEMENT TO MICHIGAN COUNTRY LINES

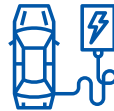

Driving Forward with Electric Vehicles

Bill Scott
President & Chief Executive Officer

The rise in demand for electric vehicle (EV) ownership has been undeniable. With automakers now producing EVs that are affordable for the common household, we support this technology by providing rebates and services to members who are ready to step into the future of driving.

Earlier this year, we announced our new incentives for those looking to purchase qualifying EV chargers. Members who purchase a qualifying charger are eligible for a \$500 rebate from Great Lakes Energy. For those members who are looking to purchase an EV with their qualifying charger, we offer an additional \$500 rebate, for a total of up to \$1000. We are excited to enrich and enhance the lives of our members and continue to support the adoption of electric vehicles by providing these rebates.

- ▶ **You can visit gtlakes.com/energy-efficiency to learn more about the benefits of EVs or the rebates offered.**
- ▶ **Visit youtube.com/greatlakesenergy to see how far our own EV can go on one charge.**

*...we are also
excited to
announce our
new free
charging
network*

Along with our rebates, we are also excited to announce our new free charging network located throughout our service territory.

Rural travel for EV owners was once difficult because they often lacked a place to charge a vehicle. We are filling in the gap by providing a place to charge your EV while still having the opportunity to explore the beautiful rural areas of our states.

We remain committed to our promise of going beyond the expected to enhance our members' lives. Whether that is through providing reliable service, offering fiber internet to rural areas, or equipping you on your journey to new technologies, Great Lakes Energy strives to go beyond expectations to connect you to the greater world.

Power. Purpose. You.

Charge your EV at any of our six charging stations.

Driving Our Territory

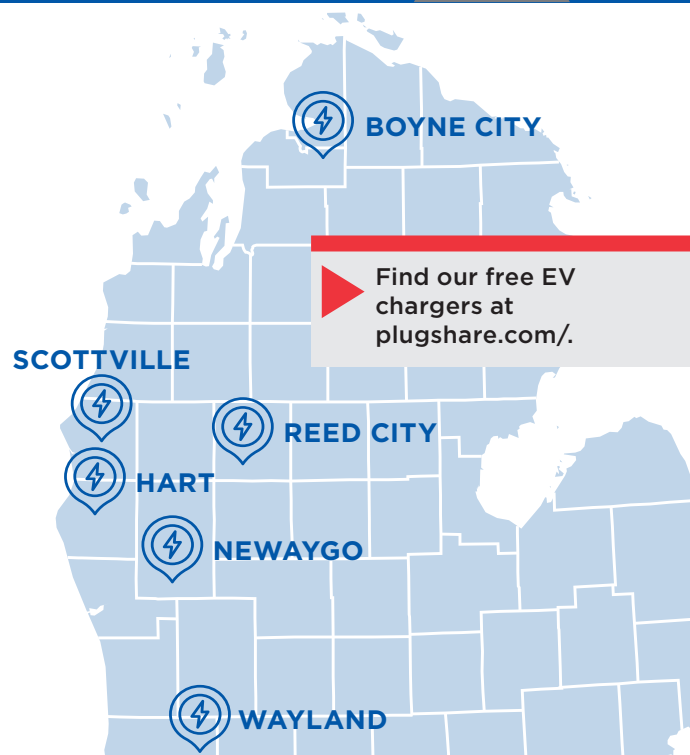

GLE exists to provide services and offerings which enhance the lives of our members.

One of the ways we are meeting that need is by offering free EV charging stations at six of our offices.

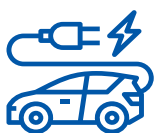

We continue to support rural communities in which we operate by allowing EV drivers to trek off the main path and into the small communities in which we operate.

The charging station is a Level 2 charger which means it can provide an EV with up to 50 miles of use in an hour. The ability of a vehicle to receive a full charge will vary by EV.

Using the charger is easy. Simply drive-up, plug-in your vehicle on a first-come, first-serve basis.

RECEIVE UP TO \$1,000 FOR A NEW EV AND CHARGER*

Great Lakes Energy is excited to offer rebates for its electric vehicle (EV) owners.

- ▶ Members who install a Level 2 Smart Charger may qualify for a \$500 rebate*.
- ▶ Members who install a Level 2 Smart Charger AND purchase a new EV may qualify for a \$1,000 rebate*.

▶ Visit gtlakes.com/energy-efficiency to learn more

**For qualified members, offer subject to change and expiration at any time. Restrictions may apply.*
