

2022 Rebate Application Electric Vehicles

Ready to get your rebate? Follow these simple steps.

Rebates are available to Great Lakes Energy (GLE) members only. One rebate is allowed per account (meter) for one of the two offers below. The EV rebate is for brand new, 100% electric vehicles (hybrids do not qualify) only and the new Level 2 smart charger must be permanently installed at the location where you receive electric service from GLE. Rebates will not be given until after installation of the charging station at the account location.

Available Electric Vehicle (EV) Rebates

1. GLE members who purchase/lease a new electric vehicle **and** permanently install a new Level 2 smart charger are eligible for a \$1,000 rebate.
2. GLE members who purchase and permanently install a new Level 2 smart charger, **but do not** purchase/lease a new EV are eligible for a \$500 rebate.

Step 1 Determine Eligibility

Verify the purchase of the new EV and new Level 2 smart charger by providing a copy of the vehicle's purchase/lease agreement and the charger's sales receipt.

Step 2 Install Equipment

Permanently install the new Level 2 smart charger at the location served with electricity by GLE.

Step 3 Obtain Verification

Obtain verification of the EV charger installation by a licensed contractor. You cannot perform the verification yourself, even if you do the installation. Contact a licensed contractor/electrician and fill out the form on the following page. The contractor must fill out their portion completely. You are responsible for payment to the contractor for this service call.

Step 4 Submit Application

Return the completed form and invoice/sales receipt(s) to GLE. Rebate request must be submitted within 90 days of purchase and installation.

Step 5 Payment

GLE will review your submission and, if approved, will issue you a rebate check or credit your electric account within 30 days.

Submit your documents online or by mail.
Call **888.485.2537 ext. 8957** for questions about this application.
